Introduction

Over the Christmas and New Year period, artificial light always becomes immensely popular. The cosiest period of the year brings us all closer together, the focus is on creating a pleasant atmosphere. Lights are dimmed, candles are brought out, as are the lights of inside and outside Christmas decorations. Still, always act carefully because in this period also the number of house fires peaks. A forgotten candle or a short circuit caused by defective Christmas decoration may well get in the way of a festive meal. So think and act safely so that you can all fully enjoy this wonderful time of the year!

Traditionally, this period is also the perfect opportunity to look back on the past year, which is exactly what we want to do with our (first) Christmas special. We have very fine memories of the fairs in which we took part in 2016, we again launched some wonderful products as well as two beautiful new collections, i.e. DALSGAARD and LAYERS, and – last but not least – “our” football team, SV Zulte Waregem, became the new Belgian mid-season champion.

We all wish you a Merry Christmas and a wonderful New Year.

New product & Queen Elizabeth

You heard right, the KING has found himself a spouse: QUEEN ELIZABETH. This chandelier retains the formal vocabulary and design of its spouse but is a bit smaller in diameter and proportion. As a result, Queen Elizabeth fits well within compact interiors too. People say its shape resembles that of a crinoline but feel free to judge for yourself.

As with our King George, you can compose your Queen Elizabeth according to your own taste and preferences. You can do this using the King George configurator on our website.

Maison & Objet (Paris)

In September, we again participated in the prestigious fair 'Maison & Objet' in Paris. For this edition, TAL worked together with nine other Belgian top-class manufacturers. Under the name 'Hotel Belchique' we turned our exhibition stand into a magnificent hotel room.

Productupdate & 2U W

We've made our popular 2U profile just that little bit sleeker. In the new version, 2U W, the diffuser has been incorporated into the side of the profile.

Fair & Interieur (Kortrijk)

At the bi-annual 'Interieur' fair in Kortrijk, we reserved our entire exhibition stand to the new designs of Sylvain Willenz, who designed a table and chairs for JOLI and matching lighting for TAL. The new collection has been given the name LAYERS and is featured by functional and versatile designs. One of the absolute highlights of this collection is no doubt the suspended luminaire TELESCOPE, which not only looks

like a telescope but can be extended as one as well. By shifting the bottom part of the tubular TELESCOPE vis-à-vis the upper element, the focused light beam as well as the resulting lighting atmosphere are changed. TELESCOPE is a beautiful mix of design and truly inventive engineering.

Design: Sylvain Willenz

Fair & Interieur (Kortrijk)

Product update & Berrier Junior

BERRIER has gained a little brother: BERRIER Junior. This suspended luminaire has the same shape as its big brother, it's just smaller. The light source of BERRIER Junior is a LUXEON M led module controlled at 350mA. This results in a brightness of 400 lumen, which – together with the glass lens – creates a very beautiful light beam.

Berrier Junior looks quite well in a cluster too.

New product & DICE

DICE is a compact, easily installed ceiling-mounted luminaire. In spite of its compact size, DICE is even available with an integrated converter. The block-shaped luminaire is simply clicked onto a small mounting plate attached to the ceiling, leaving no screws in sight. This is just one of the many design features that show that this minimalist design is the result

of some serious and clever thinking. Another example is the diamond-shaped lens and the way in which its facet lines are re-iterated in the luminaire's design. DICE is a clever and compact luminaire with a geometric design, a genuine eye-catcher in every interior.

Did You Know... 56mm

An installation hole with a diameter of 56mm is the smallest possible hole that all sizes of the most commonly available converters can get through. This is ideal for installing the converter as close as possible to the device (for instance in lowered ceilings). Besides, a diameter of 56mm is a standard hole saw.

For this reason, TAL has developed a series of devices fitting exactly into this standard hole. As such, these are the smallest possible devices with which both device and converter can be stashed into the same installation hole.

A selection of suited devices:

- HELAX SML IP20
- HELAX SML IP54
- HELAX Medium
- FUNNEL ELBOW
- KOSMOS BASE

Thanks to this development, you can – with only one hole saw – install several types of lighting that are discretely present into your interior and are very easy to install.

New product & Funnel Elbow

FUNNEL ELBOW is a directional ceiling-mounted device fitting into a 56mm installation hole. The design has been distilled down to a straightforward cylinder, the interior is conical up to the lens.

Thanks to the Haloled™ technology, this modern luminaire looks like a conventional halogen lamp while offering all benefits of a led spotlight. With its austere and modern design, FUNNEL ELBOW fits in every interior.

| 484326 | FUNNEL ELBOW 3000 LEAF | TEXT BLACK | LUXEON M 3000K |

New accessory & Kosmos Base

KOSMOS base is a new M10 base with flush-mounted connection, as is the case with recessed spotlights. KOSMOS base is ideal for mounting lightweight suspended luminaires.

As a result, the suspended device seems to disappear into the ceiling. KOSMOS base is an elegant alternative to the conventional flush-mounted boxes used for standard suspended luminaires.

TAL Classic & DART

DART is no doubt an absolute TAL bestseller. In its early days, this wall-mounted luminaire was popular foremost for its beautiful brushed aluminium finish. Meanwhile, DART is also available in a led version. We decided to baptise this version as our DARTLING because ... there 's only one DART, which is a unique and untouchable classic.
