Beauty has not been here for mere ten years. It'd been here since time immemorial, long before we began to worship it. It emerges, nurtures, fades. The motion power of the universe, of the planet, of the people. Of you and of me, of all life in all its forms.

Sparks in the eyes, inner flame, flames of passion, jealousy, eruptions on the Sun, invisible signals, floods of emotions. Not belonging to anyone, including us — the handful of devotees spreading the message in its name.

Just what is the Czech Republic and the few worldwide branches? These few hundred years of glassmaking tradition, those masters of the craft, this Leon Jakimič? What is design, or art? Who has the right to take themselves so seriously to place their ego above nature, and impose their judgement on beauty? On the way it's supposed to look, and on the way it's supposed to be viewed. No, no one, not even you.

Mere mastering the change of state — it's only sand, and then glass. Arts, procedures, nonsense about energy, wasting it or saving it. Market manipulations and light-speed races in disciplines that do not nor ever did exist.

Let it be, it's already set. Try to be free. Let live coincidences, moods, feelings, and emotions. Smiles and astonishments. Eyes narrowed or wide open. All the rays, flashes — data, if you will. Stories. Hearts aflame, even if uncomfortable. Yes, even laughter, tears, and magic.

It's not about us, we're only trying for the light beaming somewhere to make an imprint. In the right moment — for ever, perhaps — in glass and in such manner to make you grasp for air and blind with astonishment:  
“What beauty!”

For this, we love glass, for it we do this. Try to understand, and who knows — maybe you'll join in.

All the clowns' faces eaten away by  
greasepaint, ballerinas' ruined feet,

acrobats' **broken** vertebrae,  
sculptors' crushed fingers, actors' coke-  
induced nasal perforations, solo singers'

**teared** vocal cords, guitarists'  
ripped off fingernails, DJs' deaf ears,  
screenwriters' smoked lungs, painters'

etched lungs, **snapped** muscles in  
glassblowers' faces.

All that **beauty**

Forget the world's biggest festivals.  
The greatest **ROCK'N'ROLL** of all is  
happening outside of them, regardless  
of the misdirected crowds of fans.  
The largest pit is in fact to be found  
hundreds of feet beneath each one  
of us. Who of you happens to dare  
jumping in the downward lift cage and  
fall all the way to the core of things?  
To the place burning hot as **HELL** where,  
after the dark gives way, the beauty can  
struck you blind. Here, this is  
what's happening.

Did you not know that?  
The most beautiful things come to being  
under pressure.

*If, apart from radiant energy, you wish to accumulate kinetic energy, set your SPIN spinning to use its moment of inertia.*

*Kinetic energy  $E_k$  bound in a spinning flywheel is calculated by the following formula:*

$$\{ \displaystyle E_{k} = \{ \frac {1} {2} \} J \omega ^ {2} \}$$

*where  $J$  stands for the body's moment of inertia in relation to rotation axis, and  $\omega$  for the angular velocity of the spinning body. As angular velocity is directly proportional to frequency ( $\{ \displaystyle \omega = 2 \pi f \}$ ),*

*the following formula also applies:*

$$\{ \displaystyle E_{k} = 2 \pi ^ {2} J f ^ {2} \}$$

*where  $f$  stands for rotation frequency in rounds per second.*

RRRRGGBGGGBBRRRRRRRRR R  
RBBBBG GGGGG RR.

It sounds like those drunk stories retina cone cells share with the barman who's got the know-how to mix light. And what can I get you today, young man? Life's no RGB. Colour mood is a personal and changeable matter, every additive meets the others, mixing and winding around. Here red met green, there blue stands on its own, and over there blue-infused red is calling for its rights while the raison d'être, the source of light, is entering the scene — white.

AND WHY NOT!

WE ALL WANT IT SO MUCH.  
WE CANNOT LIVE WITHOUT IT. THE  
FREEDOM OF CHOICE. WE WANT  
TO MAKE OUR OWN DECISIONS.  
NOBODY'S GOING TO TELL US  
WHICH WAY TO GO. FREEDOM!  
WHAT ARE WE SUPPOSED TO  
NOT DO? IS THIS SUPPOSED TO  
BE FREEDOM? WHY NOT. AM  
I ALLOWED TO HAVE THIS  
THOUGHT? PERHAPS, BUT WHY?  
OR THAT THOUGHT, MAYBE?  
WHO'S SUPPOSED TO KNOW?  
DO WE SPLIT OURSELVES IN TWO?  
SEIZE TO EXIST? AND WHY NOT?

It's  
all so clear.  
Yet you always  
find a way to  
complicate it all. An egg.  
No need to dispute what  
came first. Forget cells, black  
holes, mathematics, or fractals.  
Looking at its perfect curves,  
there's no reason to bother with  
the infinite universe, not even  
the inner one. Yes, the egg  
means life, but let it be for  
once and try to perceive  
only one thing.  
Its beauty.

## PRESS LAMP

**There's times you get stressed to the point when nothing goes right, times you feel like shit. Other times you know  
a  
pinch is enough for you to be able to work under pressure. Have a cup of espresso and, despite your stomach being in knots, fight and wring the best out of yourself. Everything comes loose and flows out. And then comes the relief. And thus, over again and again, we block our happiness while trying to express ourselves.**

**STOP.** Everything that was true  
a while ago is no longer so. What once  
was breathable air suddenly went  
liquid and is now translucent glass.  
Loose sand / running lava / hard,  
amorphous glass. Who knows how it  
came to pass? Everything's a matter  
of perspective, broken reality between  
the living and the dead, between  
true and false, between beauty  
and ugliness. What shall be? Who  
knows — it doesn't have to be, here

**You keep quiet.**

**The awe-inspiring aura of the fungi is not here by mere chance. They were the reason for you to come down from the trees. You should be praying and sacrificing everyone. Everyone claiming that something that's been here for millions of years merely sponges on something else, which at best will uproot and wither in couple of hundred years! Who parasitizes on whom? Is this not the claim of those creatures who think have genes while the GENOM has them?**

Some people are just plain lucky. They have a look and see the result. Not mere numbers, like

the rest of us. And while we, lost in the basics, are looking for a flare, this very same grand chap puts down an

clover sees the four-leaf... unlike us, foolish enough to look for one - with a trident.

in a field of accident - no way by a square. And this equation to align someone then

*“Muuuum,  
I want a  
lollipop!”  
“Again?” “Dad said  
it’s OK!”*

Another quick-saccharide bomb explodes. Flood of saliva leaching the dissolving sugar. Coloured smiles, dilated pupils reminding of past, present, or future rose-coloured glasses. All of that goes up. Haaappineees. Cortisol deceives the brain which doesn’t know it’s got more than enough, thus requiring ever more. Once again. And another lollipop.

*“Just  
one more,  
mum, a last one,  
please –

EVE??? 🍎 You out of your mind? WTF? 🌩️⚡ That was a bit too much, wasn't it? Was it necessary? We had a deal! 😞😭 What am I to do now? How can I count on you?  
10:14

Oh Adam, this breaks my heart. 💔💔💔💔💔💔💔 It's happening by itself.  
10:17

You're a treacherous bitch!  
💀  
10:18

😬💕 Silly. Things with no seeming connection have their own rules. That's the fucking geometry He talked about. You can't have everything set up in points. There's rarely an obedient short line between the beginning and the end.  
10:23

Stop lecturing me, will you? And those see-through skirts?  
10:24

Last time you gave me a hard time about being dressed all in black. 🖤🖤 Do you even know what you want?

Will I see tomorrow? 💕💋

IF CZECHIA IS THE FUSTY VALLEY WHERE POISONS EAT AWAY ALL THE BRILLIANT IDEAS, THINGS, AND PEOPLE, THEN PRAGUE IS HERE TO SHOW HOPE THAT THERE IS A WAY OUT. NOT ACROSS THE BORDERLINE HILLS, BUT UPWARDS, RIGHT FROM THE MIDDLE. THEY'RE NO SPIRES FILTERING THROUGH THE IRON CURTAIN, THESE ARE ROCKETS AND THAT'S WHY THERE'S HUNDREDS OF THEM. YOU SAY THEY'RE CHIC? AND ASK HOW MANY OF THEM HAD BEEN LAUNCHED? WELL, THEY'RE FOSSILIZED AFTER ALL THOSE YEARS, ALTHOUGH WE ALL WANT OUT AND AWAY. FOR GOOD, NOT JUST FOR A WEEK LIKE YOU, MR. Ludwig van Beethoven, Ludwig II of Bavaria,  
Ludwig Mies van der Rohe, interview, meanwhile...

**I.** Beethoven: "There's a lot to do in the world. Do it quick."

Rohe: "Architecture, for one. Architecture is the will of given era transposed into space." ??

Beethoven: "And what am I, assessed from the perspective of the universe?"

Ludwig II: "An eternal mystery to myself and others alike."

Rohe: "Less is more, believe me!" !

Beethoven: "OK, I'll slow down: I'll be heard in heaven." II.

Ludwig II: "OK, just don't forget one thing: God is in the details."

Beethoven: "Tell me about it. I don't want to be interesting, I want to be good."

Rohe: "But that's MY line." ↵?

Beethoven: "Does it matter?"

*Wussies. Churning it out, flawless and regular in the name of perfection, as on a conveyor belt. Trying to breathe a life into a dead form, puffing and spitting out arguments like "repetition is the mother of learning" as if you were about to draw your last breath. How many of you dare to receive the muse's burning kiss? How much of the burning beauty will your throat be able to breathe in? Does it hurt to watch your own ego collapse just like the simple shape you were so content with? It shouldn't, if you were heroes.*

Do you believe the bees build their combs hexagonal simply to fit their six-legged build? Are the bees connected to a universe where all is pre-programmed, hence they simply do what they're set to?

Or are the poor little things simply trying to create circles and the much-adored shape is coming up by a sheer coincidence?

Could this all be one single truth?

**The dew** is one of the many forms of [precipitation](#)<sup>[1]</sup>. It consists of water droplets<sup>[2]</sup> appearing on an object's surface in the morning and in the evening. It appears when the outer [temperature](#) of a solid object is lower than the ambient dew point. Water vapor then begins to precipitate creating small drops on the surface of a cool object. This effect often comes to pass during [radiation](#) cooling of the [Earth](#)'s surface on bright and windless nights. Radiation cooling is especially intensive in the case of metals, plant leaves, or [glass](#).

Highest amounts of dew emerge in humid air at high [dew point](#). In the Czech Republic, even in such case, the total amount of precipitation does not exceed the level of 0.5mm.
